DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," "the present invention," etc.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is disagreement between the preamble of the claim and the body, the preamble states that the invention is to be used for financing, however, there is no limitation involved in payment or financing for any goods or services. Further, section (c) claims a piece of automotive repair equipment, it is unclear if this is the same equipment already mentioned or another, unrelated piece of equipment.

Note: for examination purposes, it will be assumed that it is the same piece of automotive repair equipment.

Application/Control Number: 10/659,071

Art Unit: 3629

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over US PAT 6,493,680 to Logan et al. (Logan).

As to claim 1, Logan discloses a billing system (title) for a pay-per-use system (col 5, lines 43-47) of a remote electronic equipment (TV converter box), with a remote monitoring device (fig 3), capable of measuring the number of times a device is used (inherent in that it bills for pay-per-view items and would necessarily need to be able to measure the number of time used else the user would be over- or under-charged).

Logan does not, however, teach using the system on a piece of automotive repair equipment. As automotive repair equipment is often electronic (such as a computer that records the fault codes from the automobile's computer), therefore, it

Page 4

Art Unit: 3629

would have been obvious to one of ordinary skill in the art to use the system as taught by Logan for automotive repair equipment as Logan discloses this system as good for billing a pay-per-use, electronic equipment.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Fisher whose telephone number is 571-272-6804. The examiner can normally be reached on Mon.-Fri. 7:30am-5:00pm alt Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on 571-272-6812. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
